

Import VHS/miniDV to iMovie (MAC)

- 1) **LOG ON** to computer (MAC not windows xp) using your GGSE username and password (same as your email account information)
 - 2) **TURN ON** the DVD/VCR player next to the computer
 - 3) **INSERT** your VHS tape or miniDV tape
 - 4) **OPEN** iMovie on the computer
 - 5) In iMovie, **CLICK THE CAMCORDER ICON** located on the left, in the middle of the screen. This will allow you import the footage from your tape.
 - 6) A screen will appear that should show your taped footage. **CLICK IMPORT.**
 - 7) **PRESS PLAY** on the VHS/miniDV player. You should see your footage being played in a window on the computer screen. This means your footage is being imported.
 - 8) **CLICK STOP** when you have finished importing your footage
-

To Export your Footage:

- 1) In iMovie your newly imported footage will appear in the editing section (bottom right side of the iMovie screen)
- 2) To edit your footage, in iMovie highlight the areas you wish to keep and drag them to the upper left section (Project Section) in iMovie
- 3) To export your footage **CLICK SHARE**, and then **SELECT EXPORT MOVIE**
